MEMORANDUM FOR: [REDACTED] A/NIO/EAP

SUBJECT : Allocation of Resources by OIA/NFAC to Analysis of North Korea, 1973-1979 (S)

REFERENCE : Letter from House Permanent Select Committee on Intelligence, Same Subject, 19 January 1979

1. In response to your request based on the referenced letter to the DCI, the Office of Imagery Analysis has reviewed its records and is providing [REDACTED] the personnel resources allocated to all aspects of intelligence on North Korea during the period of interest. For your convenience I have shown the figures as a percentage of our total office effort and by analyst and support personnel. Also, since the letter from Congress refers to the level of effort given the Vietnam War, I have included the resources OIA devoted to that problem. (S)

2. I have included OIA's effort under the heading of "Analysis" rather than "Information Process". This may appear contrary to the instructions given by Congress to include imagery interpreters as personnel who process information rather than perform analyses. However, the effort we devote to these problems include imagery as well as other sources of information. Also, showing our resource allocation as "Analysis" is consistent with our name, mission and function, and NFAC budgetary guidelines to "produce imagery-derived intelligence". (S)

3. Please call me [REDACTED] if questions arise or if I may be of further assistance. (C)
